Security Information

B. Administration and Problems:

Records Management Section - Meetings were held with two groups of Area Records Officers - the DD/A group and the DD/I group. These meetings were held for the purpose of distributing Records Management Bulletins No. 3 and No. 4. No. 3 contains instructions regarding the manner of making a survey and No. 4 proposes the issuance of an office notice regarding the preservation and disposition of records. In addition, there were discussions on the following subjects: the opening of the new Records Center facilities at [REDACTED] progress being made on an Agency Correspondence Manual; a vital materials training program for Area Records Officers at the Repository to emphasize the identification and withdrawal of such records in the event of their need; and individual progress and problems.

25X1A

The microfilming of the Biographic Register dossiers for the Vital Materials program was started 18 August 1953. It is estimated that there are 100 five-drawer cabinets containing approximately 175,000 cases to be microfilmed.

25X1A6a Records Center Section - Renovation and cleaning of the [REDACTED] was completed early in the month and the movement of records material from the [REDACTED] and [REDACTED] was completed in the following week. This move involved approximately 5,000 cu. ft. of records material which has been palletized in the Warehouse. An order for shelving has been put out for bid but it will be approximately thirty days after the bid is awarded before installation. Approximately 1,000 cu. ft. of material placed in the [REDACTED] Warehouse consisted of JANIS boxed in various sized cartons which had been moved a number of times in the past. There was no inventory of this material. We are presently sorting, boxing, and inventorying in order that the material may be made available as needed. This work is approximately 50% completed.

25X1A6a

25X1A6a Requests for all records and distribution material are being received at [REDACTED] where the main locator files are maintained. These locator files have now been brought up to date and any material in the Records Center can be readily located.

During the past year, there was an average of 134 cu. ft. per month of records transferred to the Records Center. In August, with the opening of the Rosslyn facilities, this figure rose to 210. It is anticipated that the monthly deposits will continue to increase. However, the peak of the transfers

Security Information

should not be reached until after the issuance of a bulletin currently pending which describes the facilities and services available. In order to initiate a records disposal program in the Center, plans have been completed for establishing a Disposal Tickler File that will systematically record the disposal status of all records in custody. Center personnel will be assigned, as available, to work on this file. Work will also be started on setting up a Storage Space Control File that will maintain on a current basis, information as to the availability of shelving space and its location. ✓

Mail Control Section - As a result of the inquiries sent to each branch registry regarding the amount of necessary mail service on Saturdays, the Mail Control Section was able to reduce the number of working hours from approximately 145 hours per Saturday to approximately 95. A variation in the number of hours each week is caused by the changing needs of OCI (detailed couriers) and the Director's office (staff duty courier).

The Space, Maintenance and Facilities Division is now furnishing a weekly revised schedule of the moves in order that the Mail Control Section can be currently informed.

**CONFIDENTIAL**

C. PROJECT STATUS REPORT

Project 1-53 - Records Management Survey of the Office of the Director.

No further action pending a reply to report submitted 8 April 1953.

Project 3-53 - Preparation of a comprehensive schedule for the disposition of fiscal records.

There has been no change in the status as reported last month.

Project 4-53 - Records Survey of the Office of Operations.

The survey of the Office of Operations (Contact Division) has been completed. A tentative records control schedule has been prepared and discussions with the respective offices have been scheduled. In the preliminary discussions, it appears that mutual agreement has been reached on most points. Consequently, we should be able to complete the assignment within the next month.

Project 5-53 - Rewriting of CIA Correspondence Manual.

Following a number of contacts throughout the Agency and a number of suggestions made, the original draft of the Correspondence Manual has been revised and tentative plans provide for circulation through the Area Records Officers for comments and working level clearances.

Security Information

E. WORK IMPROVEMENT PROJECTS

Project 4-53 - Preparation of Handbook setting forth procedures of the Mail Room. Courier service and messenger personnel of the Mail Control Section.

Work on the Handbook is progressing and is estimated to be 75% completed. It appears necessary to establish a new completion date of 30 September.
